Sticky.

Tapping and holding down on an entry highlights as completed (picked up)

- Each driver has their dedicated schedule view.
- Uses Log-in info.
- Alternative for phone # final column would be a simple phone icon. Similar to general "call" buttons. /popular/
- Entries here remain updated with the server as they are added, changed, or removed by user with permission.
- User with permission does this in Tab #1.
- Entries in ~~each~~ each respective hour can be sorted based on certain parameters... (A-Z, location, etc.)

sticky

sticky, can be tapped to edit driver's entries assigned.

replaces the Luis sticky.

sticky, includes drivers assigned to give rides departing at this time under it

replaces the 8:30 AM sticky.

user who is riding with/boarding with 2 more passengers they know.

- Add entry button can be replaced with a button to edit/switch to the next day's schedule. Maybe looks like: 
- Add entry button instead on upper left corner.

Return, edit
cancels edit

Moves this passenger to the driver specified.

Deletes passenger entry. In case of cancelled pick-up.

Confirm and apply changes. Returns to Full-day schedule.

• Option to edit an entry itself can be added here (if needed). For example:

- To change pick-up time
- To add a +1 to the entry.

• Tapping confirm could bring up pop-up in screen's center. Example:

- Useful when swapping many entries.
- Multiple edits tick is another idea.

Default, "Choose time"

Additional passengers coming with Pepe?

max character limit undecided for now.

Replaceable with checkbox. Ticking Yes removes this

confirms and adds entry. Returns to full day schedule and scrolls down to show the added entry.

• Amount of baggage/luggage is something that can be detailed here... if needed.

• Name has a reasonable max character limit in order to fit in the schedule view.
